

OPTICA ACTA

The International Journal of Applied and Theoretical Optics

Volume 21

Printed and Published by

TAYLOR & FRANCIS LTD

10-14 MACKLIN STREET · LONDON WC2B 5NF

Founded under the auspices of the International Commission for Optics

143

CONTENTS OF VOLUME 21

No. 1 January 1974

	Page
Editorial	
The propagation of lateral waves in absorbing media and thin films. O. S. HEAVENS	1
Ray-tracing and spot diagrams for a spherical concave grating in Seya-Namioka monochromator. ANDRÉE JOHANNIN-GILLES	11
Zur Messung des radialen Brechungsindexverlaufs von zylindersymmetrischen Gradientenfasern. K. FÖLSTER und R. HERRMANN	25
An optical incoherent correlator. KEITH BROMLEY	35
Two-photon excitation in tetraphene (organic) and dypiridinium thallium (III) penta chloride (organo-metallic). G. P. SRIVASTAVA and S. C. GUPTA	43
The surface intensity of fluorescence excited in a turbid medium. V. POLLAK	51
Dependence of the dynamic behaviour of the human pupil system on the input signal. G. J. VAN DER WILDT and M. A. BOUMAN	59
Correspondence:	
Reconstruction of transmission holograms in reflection. R. S. SIROHI	75
Conference Report	77
Book reviews	81
Conference Notice	84

No. 2 February 1974

One-dimensional optical Fourier transforms of line tracings. E. B. FELSTEAD, K. O. HILL and A. U. TENNE-SENS	85
A new theory for the practical interpretation of holographic interference patterns resulting from static surface displacements. D. BIJL and R. JONES	105
A theoretical analysis of laser Doppler flowmeters. B. ELIASSON and R. DÄNDLIKER	119
A coherent-optical method for measuring fibre diameters. W. FINK and W. SCHNEIDER	151
Second harmonic generation from a naphthalene Raman laser. G. P. SRIVASTAVA and S. C. GUPTA	157

No. 3 March 1974

Ebert spectrometers free of astigmatism and coma. JAMES W. HORWITZ ...	169
Optische Bildverstärkung mit einem neodym-dotierten Glasfaserbündel. C. ABERLE, W. FRIEDL, H. KARNING und H. KRÜGER	191
Diffraction and interference with partially coherent light traversing side-by-side low frequency sound-fields. Y. OHTSUKA	211

	Page
Spatial and temperature profile effects on the fundamental and the SH waves. S. C. GUPTA and G. P. SRIVASTAVA	221
Speckle holography. P. T. GOUGH and R. H. T. BATES	243
Book reviews	255

No. 4 April 1974

An experimental verification of a new theory for the interpretation of holographic interference patterns resulting from static surface displacements. R. JONES	257
The method of the caustic for measuring optical surfaces. R. P. PLATZECK and J. M. SIMON	267
A vertical horopter. G. AMIGO	277
A reflectometer for measurements of reflectivity of dielectric mirrors. F. PETRU and J. KRŠEK	293
Reflectance properties of luminescent powders. E. L. SIMMONS	315
Diffraction of focused laser beams. R. SAMBASIVAN	323
Definitions of coherence time, coherence area and coherence volume for superposed coherent and chaotic radiation. J. PERINA and L. MISTA	329
Book reviews	341

No. 5 May 1974

Reduction of speckle in coherent imaging by spatial frequency sampling. P. HARIHARAN and Z. S. HEGEDUS	345
Highly efficient dichroic phase holograms in KCl:Na. H. BLUME	357
Untersuchungen zur Protanomalie: Farbart. H. SCHEIBNER und M. BOLL	365
Untersuchungen zur Protanomalie: Chrominanz und Leuchtdichte. H. SCHEIBNER	375
Application de conducteurs optiques aux mesures en mécanique des fluides. R. BRODT, O. SCRIVENER et L. ZILLIOX	387
Calculations on the optical modulation transfer function of the human eye for white light. A. VAN MEETEREN	395
A detailed theoretical study of the anomalies of a sinusoidal diffraction grating. R. C. MCPHEDRAN and D. MAYSTRE	413
Correspondence:	
A simple method for determining the inner scale of turbulence using variance of laser beam log-amplitude scintillations. L. ŠUMICHRASŤ	423
Book reviews	427

No. 6 June 1974

The effect of errors in the optical monitoring of narrow-band all-dielectric thin film optical filters. H. A. MACLEOD and D. RICHMOND	429
New method for optical pumping of a solid state laser through the use of light fibres. V. KATSAROS and P. PETALAS	445
The calculation of the optical transfer function for systems with central obscurations. I. POWELL	453

	Page
Effect of truncation of noisy line spread function on the computed optical transfer function. M. TAKEDA and T. OSE	477
Eine verbandstheoretische Klassifikation der Protanomalie und Deuteranomalie. H. SCHEIBNER	489
Determination of ratio of complex eigenvalues of optical systems with known eigenpolarizations by ellipsometry. R. M. A. AZZAM and N. M. BASHARA	497
Correspondence:	
The dependence of certain illusions upon the level of illumination. A. E. DRYSDALE	509
Symposium Notice	511
Book reviews	513

No. 7 July 1974

A contribution to hologram imagery. I. PŘIKRYL	517
Biased time-average holography. P. C. MEHTA	529
Holographic-recording characteristics of diazo photosensitive films. K. O. HILL and G. W. JULL	535
Sur la détermination holographique de l'état de déformation à la surface d'un corps non-transparent. M. DUBAS et W. SCHUMANN	547
Spatial pulse modulation for coherent optical densitometry. W. SCHNEIDER	563
Non-polarizing beam splitters. H. F. MAHLEIN	577
Diffraction par un système coin-miroir parfaitement conducteur. M. VAMPOUILLE et P. FACQ	585
Book reviews	597

No. 8 August 1974

The aberrations of cat's eyes in Fourier spectrometers. W. H. STEEL	599
Some observations on the long-term stability of optical flats. G. D. DEW... ..	609
Some experiments on precision lens centring and mounting. K. H. CARNELL, M. J. KIDGER, A. J. OVERILL, R. W. READER, F. C. REAVELL, W. T. WELFORD and C. G. WYNNE	615
Some properties of the near field of diffraction gratings. D. MALACARA	631
Effect of a low efficient shutter on balanced aberrations. Y. OKANO and M. MINO	643
Image processing by multiple aperture scanning. T. HONDA, J. TSUJIUCHI and S. ISHIGURO	653
Localization of interference fringes in holographic interferometry. I. PŘIKRYL	675

No. 9 September 1974

Reduction of speckle in coherent imaging by spatial frequency sampling. II. Random spatial frequency sampling. P. HARIHARAN and Z. S. HEGEDUS	683
--	-----

	Page
An examination of the suitability of holographic low-pass, high-pass and band-pass filters for the recognition of characters featuring a semantically simple structure. G. WINZER	697
Super-resolution through error energy reduction. R. W. GERCHBERG ...	709
The depolarization of electromagnetic radiation in a random medium: evolution of the Stokes parameters. R. BOURRET	721
Frequency response of apodized systems. S. D. GUPTA and M. SINGH ...	737
Book reviews	755
Obituary	761

No. 10 October 1974

Some effects of temporal coherence on the first order statistics of speckle. G. PARRY	763
Non-uniform population inversion effects in the dynamics of a single-mode solid-state laser. V. S. IDIATULIN and A. V. USPENSKY	773
Scattering pattern in ruby lasers. T.-K. WANG, C.-H. TING, C.-T. FANG and H. H. Su	783
Zur Genauigkeit der Messungen kleiner optischer Drehungen mit einem Ringinterferometer. K. ZANDER	793
A method of improving the optical transfer function of an astigmatic circular aperture. J. N. MAGGO, K. N. CHOPRA and G. S. BHATNAGAR	801
Contribution à la détermination des fonctions de transfert par la méthode du 'bord de plage'. J. AZNAREZ, J. CORNO, M. LAMARE et J. SIMON ...	809
Influence of condenser transmission characteristics upon the performance of microscopic systems. A. K. JAISWAL and R. K. BHOGRA	819
Complex image determination in electron microscopy. J. C. H. SPENCE ...	835
Correspondence:	
A broad-band neutral density filter. D. FLINT and P. BAUMEISTER ...	839
Book reviews	841

No. 11 November 1974

The effect of anticipation on the transfer function of the human lens system. G. J. VAN DER WILDT, M. A. BOUMAN and J. VAN DE KRAATS	843
Effects of spatial coherence on Fourier imaging of a periodic object. H. FUJIWARA	861
Electromagnetic beam fields. W. H. CARTER	871
Bragg diffraction of light by a standing sound wave. V. N. MAHAJAN and J. D. GASKILL	893
First-order statistics of combined random sinusoidal waves with applications to laser speckle patterns. R. BARAKAT	903
On the notation of the convolution integral. W. GOUGH and R. P. WILLIAMS	923
Symposium Notice	925

No. 12 December 1974

Page

On the limiting bandwidth of interference filters: influence of temperature during production. E. PELLETIER, P. ROCHE and L. BERTRAND ...	927
Réalisation de filtres 'double onde' à bandes passantes très étroites sur supports en matière plastique (mylar). M. CANDILLE et J. M. SAUREL	947
Polarization effects in multilayer dielectric thin films. K. RABINOVITCH and A. PAGIS	963
Calculation of axial polychromatic optical transfer function. R. BARNDEN	981
Correspondence:	
Fifth-order aberrations in in-line holograms. P. C. MEHTA ...	1005
Book reviews	1009
Index of authors (with titles)	1011
